

ROLLING

EGG

01

Cook the eggs until they become firm and let them cool well, then customize them as you like: unleash your imagination!

02

Mark out a space with two ropes, one opposite the other. You can also use two pillows or other objects that you have available.

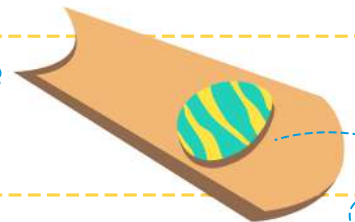

03

The space obtained will be the field of action for the eggs where you will establish a starting line that no player must cross: this will be the point where you can throw/roll your eggs.

04

Take a piece of cardboard and bend it a little, like a slide. The first player slides the egg on the card to make it gain speed, placing it on the ground.

05

Once each player has made a throw, check the egg that is closest to that target, determining the winner of the run.
